## Connecting from an IOS device

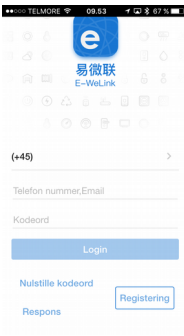

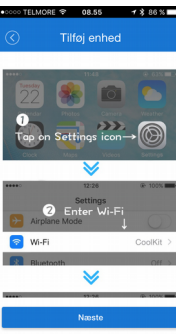

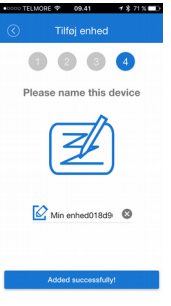

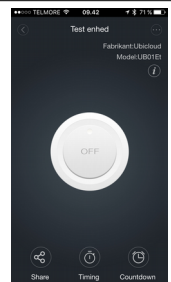

|  |  |   |
|--|--|---|
| <p>Install Ewelink from the app store.</p> <p>1</p>                   | <p>Press and hold the button on the device until the LED blinks quickly to enter pairing mode.</p> <p>2</p>  | <p>Register and Log in on the app.</p> <p>3</p>                            |
| <p>Follow the instructions in the app to add the device</p> <p>4</p>  | <p>Connect the phones Wi-Fi to the device with password 12345678</p> <p>5</p>                                | <p>Type in the SSID and password of your WiFi Router</p> <p>6</p>          |
| <p>Pair the device.</p> <p>7</p>                                     | <p>Add a name for the device.</p> <p>8</p>    | <p>The device will show up in the list of devices</p> <p>9</p>            |
| <p>Press button in the middle to turn on</p> <p>10</p>              | <p>Press button in the middle to turn off</p> <p>11</p>    | <p>Turn on and off manually with the button on the device</p> <p>12</p>  |

### Led Indicator

- Led fast blink – Pairing status
- Led slow blink – connected to the router and server but not registered in the account. Try adding the device again. NOTE: if it is already added to another account, it must be deleted from the other account first.
- Led fast blink twice and then off for 2 sec. – It is connected to the router but not the server. Check internet connection.
- Led fast blink once and then off for 2 sec. – Failed to connect to the router.
- Led on – Successful connection

**Important** – The device is controlled through a server on the internet. It will not work without internet connection. The device can only be registered to one account at a time. The device must be first deleted from previous accounts or shared from within the account to other accounts.
